

1— Quality Directory Submission Service

One Way Link | High Traffic | High PR Ranking | More Sales

Create a one-way link for your website. Submit your site to SEO friendly directories.

- Search engine optimization (SEO) has started turning submission to directories and articles to its advantage. You could have an excellent website, and you may have the latest e-commerce technology and the best graphic design work. Now comes the tricky part: choosing an SEO firm. There's a long list of SEO firms claiming that they can do submission to directories, link building and article submission, but does a chocolate website really need to build links to an oil merchant directory?
- Google has implemented LSR and has already started shunting out link farms, and pointless paid links. For any SEO firm or webmaster, the most worthwhile ways forward are articles and other web contents. Not only does our article submission service ensure that all incoming links to your site are 'relevant,' we also ensure that your precious time and resources are not wasted on futile link building.
- Our submission services ensure that each manual directory, we submit to is relevant to your site; each directory is chosen based on pedigree and reliability. Any major search engine that actually catalogues and indexes a directory has to meet certain criteria. Our service ensures that each directory, we submit to has been thoroughly researched and not blacklisted by any search engine. Better still, we offer only one-way linking services so no reciprocal links are required.

Key Features:

- We manually submit to all directories. Our staff members are well trained and they follow all submission guidelines.
- The links that you get are one-way permanent links for your website; no reciprocal links are required.
- We constantly, review, verify and update all the links in our 8000+ directories.
- We provide excellent customer service; all queries will be answered within 24 hours.
- We give full report on submissions. Click to see a sample report.
- We submit your site to directories with high PR rank.
- We allow our users to give 10 unique titles and 10 unique descriptions to avoid duplication of content.
